Verse 1
           G    G
In the beginning
                Em
You spoke, there was light
                 D
Your word formed creation
                     C
And Your breath gave us life
                 G    G
We walked in the garden
             Em
It brought You delight
                    D
How You loved to be with us
              C
We were fully alive

Chorus 1
           Am   G   D

                 G    G
Our fellowship broken
             Em
As we were decieved
                D
The joy of the garden
           C
Was now out of reach
                   G    G
But You chose to pursue us
               Em
You longed for us still
                D
You did not forsake us
             C
And You never will

A pillar of fire

That lit through the night

And the cloud of Your glory
             C
No one could deny
               G    G
We build You a temple
              Em
But You wanted more
                  D
You longed for a people
                  C
That could be called Yours

              Em
The Word became flesh
                D
Our God dwelt among us
                C
You gave us Your best
              G    G
You offered communion
              Em
You gave up Your life
                D
You rose up in vict'ry
                C
And healed the divide
```
