Verse
            B
When it feels like the dark
                           D#m
Lingers longer than the night
                           E
When the shadows feel like giants
                      B
Are You chasing me down

Verse
            B
Tell me where could I run
                              D#m
From Your light, where could I hide
                           E

Chorus
G#m
Highs and lows
                           E
Lord, You're with me either way it goes
                         B
Should I rise or should I fall
G#m

You're too good to let me go
Verse
            B
Should I dance on the heights
                           D#m
Or make my bed among the depths
                         E
Your mercy waits at every end
                         B
Like You planned it from the start

Verse
              B
Should the dawn come with wings
                           D#m
```

```
Or find me far-side of the sea
                            E
There Your hand still fastens me
                        B
Ever closer to Your heart, ooh

Chorus
